Mori Building to Provide Power from its Roppongi Hills Generation Facilities to TEPCO

Mori Building Co., Ltd., will pass on electrical power from the generation facilities in Roppongi Hills operated by Roppongi Energy Service Co., Ltd., a Mori Building subsidiary, to the Tokyo Electric Power Company (TEPCO) out of concern over the power supply shortage stemming from the Tohoku Region Earthquake.

Roppongi Hills is supplied with electrical power onsite from its own energy plant (a Roppongi Energy Service Co., Ltd. operated facility). The plant uses municipal gas as fuel and can therefore provide an extremely stable supply of power without being affected by electricity restrictions. Mori Building will provide electrical power to TEPCO, as power capacity is freed up through power saving measures taken at Roppongi Hills (Mori Building) and through the cooperation of corporate tenants and residents in saving electricity.

- **Details of Power Provision**

Transmission Period: March 18 – March 31, 2011¹

Supply Hours: 24 hours per day

Power Supplied: 6:00 a.m. – 8:00 p.m.: 4,000 kW / 8 p.m. – 6:00 a.m.: 3,000 kW

(4,000 kW = power needed for about 1,100 standard homes)

1. The arrangement may continue from April 1 upon consultation with TEPCO.
