

~To Be Linked with Ark Hills, Improve Local Pedestrian Mobility~
Construction Started for “21 & 25 Mori Building Reconstruction Project”
(Provisional Name)

On Tuesday, April 5, Mori Building Co., Ltd., held the safety ceremony for the “21 & 25 Mori Building Reconstruction Project” (provisional name) and began construction of the building framework.

The project is an integrated reconstruction plan for the Roppongi 21 Mori Building and Roppongi 25 Mori Building that will replace the two buildings with a single high-quality high rise office building. The project will include a pedestrian deck that links with the adjacent Ark Hills to link the project with Ark Hills to improve pedestrian mobility, link with the local community, and increase the attractiveness of the Akasaka-Roppongi area.

Mori Building is focused on meeting the project’s scheduled completion date of June 2013.

Artist's concept of completed project

[Project Main Features]

- Improve pedestrian mobility by connecting with Ark Hills via a pedestrian deck.
- High-quality and spaces offices directly linked to the train station (Approx. 1,900m2, prepped floor, 2.9m ceiling height)
- Lush greening plan (one of the largest roof gardens in Tokyo, and bio-diverse ground level plantings)
